

evolEV: Supporting the Evolutive Expansion of Technical and Entrepreneurial Knowledge Sets for Electric Vehicle Technologies

EvolEV is a project that targets developing the technical and entrepreneurial competencies of at least 500 current and future professionals in the EV sector in the Balkan region through a digital learning platform, accredited training programs and courses, workshops for technical skills and competitions for business plan development thus impacting a growing industry in need of more than 10000 workers in the near term in partner countries. In 2025 the platform will open to the public, and those that will enroll and successfully finalize this line of study will receive institutionally accredited courses with microcredentials (5 ECTS). Virtual and Living Lab will be offered through the hub to researchers and industries worldwide for innovative research.
