

SUMMARY

<u>Fuel Cell Systems: Modeling and Experimental Validation -</u> <i>Marie-Cécile Pera, D. Hissel and J.M. Kauffmann</i>	3
<u>DSP-Based Controller for Direct Torque Control of Induction Motor Drives in Railway Traction System -</u> <i>D. Iannuzzi and R. Rizzo</i>	13
<u>Sensors for Ignition Systems of Spark-Ignition Engines – A Review -</u> <i>I. Rus</i>	22
<u>Investigation of a PWM Line-Friendly AC-to-DC Converter System with the Use of the MATLAB Software -</u> <i>M. Bojan and R. Marschalko</i>	29
<u>Investigation of a PWM Line-Friendly AC-to-DC Converter System with the Consideration of the Commutation -</u> <i>E. Csatlas and R. Marschalko</i>	37
<u>Robust Control of Servo DC Motor: LMI Approach -</u> <i>P. Dobra, Gh. Lazea, D. Moga and Mirela Trușcă</i>	43
<u>Controller for Servo DC Motor via Robust Synthesis -</u> <i>P. Dobra</i>	49
<u>Four Loops Supervisory Control for Virtual Enterprise -</u> <i>A. Curaj, A.M. Stănescu, S.I. Caramihai and M. Chircor</i>	53
<u>Hybrid Control Architecture Supported by T-Temporal Petri Nets -</u> <i>S.I. Caramihai and A. Curaj</i>	63
<u>Electrical Energy Charging System -</u> <i>L. Iulian and I. Matlac</i>	70
<u>The Radiant Field Produced by Volume Sources of Radiation -</u> <i>V. Cilinghir</i>	74
<u>The Determination of the Mutual Luminous Inductivity Between Two Luminous Disk -</u> <i>V. Cilinghir</i>	77

<u>Gyrators in Power Converters -</u> <i>Şt. Hărăguş, D. Toader, Gabriela Tonţ and D. Tonţ</i>	79
<u>Power Converters with Double Bridge as Gyrators -</u> <i>Şt. Hărăguş and D. Tonţ</i>	84
<u>Some Considerations About Cuadripolar Parameters Expressions for Antireciprocal Two-Port Network -</u> <i>Şt. Hărăguş and D. Tonţ</i>	87
<u>Hall Gyrator as a Component of Unidirectional Diagram -</u> <i>D. Tonţ</i>	92
<u>Verification of Analytical Results PC-Spice Simulation and Experimental Way in the Case of Gyrator Operational Amplifier -</u> <i>D. Tonţ</i>	96
