

SUMMARY

<u>Improvement of Sparse Computation Application in Power System Short Circuit Study -</u> <i>A. Mega, M. Belkacemi and J.M. Kauffmann</i>	3
<u>Analytical Description of the Healthy Induction Machine Frequency Response for Diagnosis Purposes -</u> <i>Claudia Marțiș</i>	9
<u>Unipolar Driver for Stepper Motor Control -</u> <i>A. Morar</i>	17
<u>Sequencer for Four Phase Stepper Motor Control -</u> <i>A. Morar</i>	23
<u>A Safety Assessment Method for Safety-Critical Control Systems -</u> <i>E.I. Gergely</i>	29
<u>Verification of Sequential Function Charts Using SMV -</u> <i>E.I. Gergely</i>	38
<u>Digital Design Optimization for Bidirectional Ports of the Microcontrollers -</u> <i>A.D. Potorac</i>	46
<u>A Multi Agent System for Train Ticket Booking -</u> <i>C. Turcu</i>	53
<u>The Ceramics Behaviour in a Microwave Field; Stating the ϵ', ϵ'', $\text{tg } \delta$ Parameters -</u> <i>O. Popovici and Diana Popovici</i>	61
<u>The Disturbances Method Applied to a Microwave Field by Means of a Measuring Equipment, for Stating the Materials Dielectric Properties -</u> <i>O. Popovici and Diana Popovici</i>	65
